CAMPAIGN AGAINST NUCLEAR TESTING

On the 50th Anniversary of Hiroshima

SAY *NO* TO FRENCH NUCLEAR TESTING IN THE SOUTH PACIFIC

Despite widespread opposition, the French government is *still* continuing with its plans to break the moratorium on Nuclear bomb tests, and begin testing these weapons of mass destruction in the South Pacific in September.

If we allow these tests to go ahead they will create an ecological disaster in the South Pacific. Once the French break the ban on nuclear testing, other nations will follow, with untold effects on the environment as well as threatening world peace.

On July 14th—Bastille day—the people of Europe and of the South Pacific made their opposition to nuclear testing clear, with hundreds of thousands worldwide involved in petitions, demonstrations and marches.

Now on the 50th Anniversary of Nagasaki and Hiroshima, we must let the French government know the outrage felt at their plans to rekindle the nuclear threat. Join the demonstration on August 12th and let your voice be heard!
